www.linkedin.com/in/kimberly-jane-harry-202961180 | <https://janekimberly17.github.io/portfolio/>

A software engineer with a foundation in data analytics, machine learning, AI and full-stack development, currently pursuing a Certificate in AI and Cloud for Construction at Gamuda AI Academy. Proven ability to transform operational data into machine learning models and business intelligence dashboards that measurably improve efficiency.

TRAINING & CERTIFICATION

Certificate in AI and Cloud for Construction

Jun 2026 – Present

Gamuda AI Academy, CENTEXS, Kuching, Sarawak

- Lead a group of four members, a mixed-skill team delivering a predictive maintenance platform that forecasts heavy equipment failures, aimed at reducing unplanned downtime and repair costs.
- Engineer a simulated IoT sensor data pipeline to train uptime and MTTR prediction models, enabling model development before real fleet data is available.
- Architect a multi-agent LLM system (LangGraph, FastAPI) that detects equipment anomalies and automatically dispatches work orders to technicians, with human approval for critical decisions, to shorten response time from fault to repair.

Technology Graduate Bootcamp 2025

Jul 2025 – Aug 2025

Standard Chartered Global Business Services, Bukit Jalil, Kuala Lumpur

- A comprehensive training programme focused on full-stack development principles and practices.
- Earned the Best Full Stack Team Project among 100+ international graduates.

ASEAN Data Science Explorers 2024 – SAP Analytics Cloud and SAP Build Apps Training

May 2024

Universiti Teknologi PETRONAS (UTP), Perak

- 1-day programme that elevates the skills of participants in data analytics and app development by utilising SAP.

WORK EXPERIENCE

FULL STACK ENGINEER | Standard Chartered Global Business Services

Jul 2025 – Mar 2026

Bukit Jalil, Kuala Lumpur

- Modernised legacy COBOL mainframe lending functions into Java-based System APIs, deployed to Singapore and Vietnam as part of the bank's API modernisation across its Asia, Africa and Middle East markets.
- Built 10+ REST endpoints (GET, POST, PATCH, DELETE) for loan, mortgage and instalment products, delivering each from user story to release in two-week Agile sprints using Azure DevOps and Git.
- Translated regulatory and business requirements into data and API specifications for four retail lending services.
- Verified the reliability of each API before deployment through unit, system integration (SIT) and regression testing using IntelliJ and Postman.

SOCIAL MEDIA MARKETING LEAD (PART-TIME) | Kneaddy Creative Studio

Feb 2024 - Jun 2024

Seri Iskandar, Perak

- Directed marketing and customer service operations, including an end-to-end product launch campaign.
- Increased social media following by 10.3% through strategic content and community engagement.

DATA ANALYST INTERN (MECHANICAL STATIC) | PETRONAS Carigali Sdn Bhd

Jan 2023 – Aug 2023

Miri, Sarawak

- Cut engineering reporting man-hours by 56.5% by leading the rollout of a maintenance reporting and analytics system to 30 user groups, serving as the focal person between HQ, the digital team and upstream site engineers.
- Digitised and structured 8,000+ legacy engineering reports, making previously stranded maintenance data searchable and audit-ready.
- Designed a data taxonomy framework aligned with PETRONAS Data Governance and Assurance standards, standardising the classification of inspection and maintenance reports during data extraction, including planned preventive maintenance (PPM) and corrective maintenance (CM).
- Built a Power BI dashboard for data verification and issue escalation, replacing manual Excel tracking across teams.
- Drove system improvements from the first MVP onwards, converting field engineering feedback into prioritised enhancements that the digital team implemented through regular progress reviews.

EDUCATION

BACHELOR OF INFORMATION TECHNOLOGY (HONS.)

May 2021 – Sep 2024

Universiti Teknologi PETRONAS (UTP), Perak

CGPA: 3.69

Relevant Coursework: Big Data Analytics, Machine Learning, Data Visualisation, Database Systems, Internet of Things, Principles of Finance, Business Accounting
Awards & Honours: Dean's List for all semesters

FOUNDATION IN TECHNOLOGY (INFORMATION TECHNOLOGY)

May 2020 – Apr 2021

Universiti Teknologi PETRONAS (UTP), Perak

CGPA: 3.58

Awards & Honours: Dean's List for 2 semesters of 3 semesters, Silver Award for English Public Speaking Competition UTP (2021)

RESEARCH & TECHNICAL PROJECTS

repAlr: Predictive Maintenance and Fleet Health Platform

Capstone Project | Gamuda AI Academy

Jun 2026 – Present

- Develop a full-stack platform (React, FastAPI) that predicts failures and tracks fleet health for construction heavy machinery, such as excavators.
- Train fleet uptime and MTTR prediction models using (model types, e.g. Random Forest, RNN) on data generated from simulated IoT sensors (Wokwi), and auto-assign maintenance tasks to technicians.

Playworks Web Design & Development

Freelance | Playworks Reading House

Sept 2024 – Dec 2024

- Designed and deployed a responsive corporate website for a children's literacy intervention centre.

The Development of Nanomaterial (SiO₂ & TiO₂) Risk Assessment Using a Random Forest Model

Mentorship & Technical Support | Cross-Disciplinary Collaboration

Sept 2024 - Dec 2024

- Developed a Random Forest risk-assessment model with an end-to-end pipeline covering feature engineering, scaling and encoding.

Elderly Gigs: Empowering Senior Citizens through a Senior-Focused Career Platform

Final Year Project (FYP) | UTP

Jan 2024 - Aug 2024

- Designed an accessible employment platform for senior citizens grounded in human-centred design principles.

Taxonomy Classification of Stranded Data in Mechanical Static Reports

Industrial Training Project | PETRONAS Carigali Sdn Bhd, Miri, Sarawak

Jan 2023 – Aug 2023

- Engineered a classification framework to standardise unstructured maintenance records.

ACTIVITIES AND INVOLVEMENT

- Creative Designer, First Attempt in Learning (FAIL) Forum, PETRONAS Carigali Sdn Bhd, 2023.
- Committee Member of Design, Technical and Media, Society of Petroleum Engineers (SPE-UTP-SC), UTP, 2022.
- Committee Member of Public Relation and Media, Malaysia-UAE Cross-Cultural Exchange, UTP, 2022.

ACHIEVEMENTS

- Best Full Stack Team Project during Technology Graduate International Bootcamp, Standard Chartered, 2025.
- CSD Outstanding Club/Society Award (Academics), SPE-UTP-SC, UTP, 2022.
- Student Chapter Excellence Award, SPE-UTP-SC, UTP, 2022.

SKILLS

AI and ML

Machine Learning, LLM Agents (LangGraph, LangChain), Computer Vision (YOLO), [scikit-learn, pandas, NumPy, PyTorch or TensorFlow]

Data

Python, PostgreSQL, Data Visualization, Big Data Analytics

Software Engineering

FastAPI, React, RESTful APIs, Java, JavaScript, HTML, CSS, COBOL

Testing

Unit Testing, System Integration Testing (SIT), Regression Testing, Postman

Tools and Methods

Git, Azure DevOps, IntelliJ, Visual Studio, Agile, CRISP-DM

Strengths

Stakeholder Management, Change Management and User Adoption, Cross-Functional Team Leadership, Technical Communication, Public Speaking, Cross-Cultural Collaboration

Languages

English (Advanced), Malay (Advanced), Mandarin (Intermediate), Iban (Native)
